

## ***“The Autism Epidemic”*** **First in the “Immunization” Series**

**April Renée**

**Keynote Speaker for Vaccine Information Coalition (VIC)**

I have the privilege to teach all over the world in honor of my autistic daughter, who passed away on June 13<sup>th</sup>, 1999 at just four years of age. The only reason I’m able to breathe today, after losing the most important thing in my life, is because God has made my mission very clear.

I realized that Casi was vaccine injured even before she received the “label” of autism. I say, “label”, because this is what mainstream professionals want us to call these vaccine-injured children. The autism label implies that their condition had no preventable cause and (currently) has no cure, but happened by some random genetic chance. Autism is now found in **one out of every 67 children**, and this doesn’t include other vaccine related disorders, such as Attention Deficit Disorder (ADD) and Attention Deficit Hyperactivity Disorder (ADHD). These conditions have become absolute epidemics through the years, but who ever heard of a “genetic epidemic”?!

I have dedicated the rest of my life to doing WHATEVER is necessary to help these innocent victims of vaccine injuries, including their families who are victims too, and in trying to protect future children from the supposed “autism epidemic”!!!

### **WHAT IS AUTISM?**

Autism is an increasingly common developmental disability that typically appears in childhood, usually during the first three years of life. Frequently, there is a period of normal development followed by either a sudden or slow-but-steady regression or loss of skills. It is commonly believed that the cause or causes of autism are unknown. Tragically, since the 1940s the funding for autism research has been limited to the area of genetics, when the condition was described by Kanner. Of course, the medical/pharmaceutical community wants to find a way to treat a supposedly heredity disease, not look into whether they may have negligently created the condition in the first place!

### **VACCINES**

We are told that our children are not permitted to attend school without all the mandatory vaccines. This is simply NOT TRUE!! There are exemptions for vaccines in almost every state, which allow our children to attend. Unfortunately, this is often covered-up, and when exemptions **are** acknowledged by

school or health personnel, they are often misrepresented. For example, it is said that religious objections must be associated only with certain specified religious groups; this is not only incorrect, but also absolutely unconstitutional!

**God** created us with a perfect immune system! He gave us fever to burn up pathogens and vomiting and diarrhea to quickly eliminate toxins. But we've allowed **man** to teach us to suppress these crucial, natural, life-protecting safety mechanisms. We are brainwashed to convince us that we should do anything we can to avoid feeling the symptoms; but when we learn the truth of how miraculous God created us, we realize that the symptoms are not our enemy, but actually His solution to the problem. Next, we allow **man** to convince us to surpass God's perfectly designed defense mechanisms and inject biological toxins directly into our bloodstream, all under the guise of creating immunity. We're literally allowing man to play the role of God; and, of course, man plays that role very poorly!

Apart from what you may have heard, vaccines today STILL contain ingredients such as antifreeze, phenol (used as a disinfectant), formaldehyde (cancer causing and used to embalm), aluminum (associated with Alzheimer's disease and seizures), glycerin (toxic to the kidney, liver, can cause lung damage, gastrointestinal damage and death), urine, fecal matter, lead and cadmium, sulfates, yeast proteins, antibiotics, acetone (used in nail polish remover), neomycin, and streptomycin (antibiotics). And the ingredient making the headlines these days is thimerosal, a preservative still used in many vaccines, that is more toxic than mercury, not easily eliminated from the body, and can cause severe neurological damage, as well as other life-threatening autoimmune disease.

Plus, these vaccines are grown and strained through animal or human tissue, like monkey and dog kidney tissue, chick embryo, calf serum, human diploid cells (the dissected organs of aborted fetuses), pig blood, horse blood, and rabbit brain. Yuck! The problem with using animal cells is that during serial passage of the virus, the contaminating animal RNA and DNA can be transferred from one host to another, and then onto you!!

Undetected animal viruses and genetic material may slip past quality-control testing procedures, as happened in 1955 through 1961 with SV40 (i.e. "simian virus #40", meaning the 40th monkey virus found.) Congressional hearings were finally held in Washington, DC on September 9, 2003, more than 40 years later, by the Subcommittee on Human Health and Wellness, U.S. Government Reform Committee, Chaired by Congressman Burton (R-IN). SV40 is associated with brain, bone, and lung tumors found in both children and adults. New information released during that testimony suggests that the live oral polio vaccine used until the late 90's may have been contaminated with SV40 as well!

## **CURE OR CAUSE?**

Evidence that autism is not a genetic condition, but an autoimmune disease, is extremely strong. Autoimmunity is when the body cannot distinguish between self and non-self. Toxins in the vaccines stay in the blood and take the upper hand when our body is stressed. We all know someone with at least one autoimmune "label" such as: *cancer, chronic fatigue syndrome, fibromyalgia, depression, schizophrenia, anxiety disorder, seizures, developmental delays, autism, ADD/ADHD, lupus, multiple sclerosis, Alzheimer's, Parkinson's, Crohn's disease, OCD, arthritis, diabetes, ALS, IBS, Bi-Polar, Lyme's disease, thyroiditis* and many, many more! We are led to believe that the toxic ingredients and genetic material in vaccines can be injected into the immature immune systems of newborn babies, all the way up to the weakened immune systems of elderly adults, as well as everyone in between, with absolutely no negative effects!!! How could that be?! Yet we buy right into it!

Guess what? Many many diseases were on their way out of the human population before mass-vaccinations began; but man-made epidemics have their own lifespan. According to the World Health Statistics Annual 1973 – 1976, Volume 2, there has been a steady decline of infectious diseases in most developing countries regardless of the percentage of vaccines administered. Researchers pointed out that infectious diseases disappeared as the result of modern sanitation methods, improved public water supplies and personal hygiene, and better distribution and increased consumption of fresh fruits and vegetables. From 1850 to 1940, diseases had declined 90% and were at an all-time low, just when vaccines started to be introduced. In addition, diseases for which there was never a vaccine have also declined dramatically. How do we account for that if vaccines are the answer?!

My Brothers and Sisters, especially you who are parents, we need you to realize that you DO have options, and that you DO have the right and the obligation as a steward of yourself and your family to make informed health choices.

The solution to autism and other vaccine-induced conditions will come by addressing the cause, not by suppressing the symptoms.

Just like every other “dis-ease”, there is no money in actually curing autism, but lots of money in treating it. So let’s stop allowing the *fox to watch the hen house*, which turns our children into new income streams for the medical/pharmaceutical industry. We MUST stop this insanity!

I am here today to help you, because I wish someone had shared this information with me before I chose to trust the doctors, and ignorantly hold my daughter down and allow her to be injected. Since Casi’s passing, life has not been, nor ever will be the same, as I’m sure you can understand. Don’t let this happen to you!

Thank you so much for listening to what I have shared, and most importantly I thank GOD for giving me the strength to survive and speak the truth.

Please do not become another victim.

Learn from our mistake, “Educate **BEFORE** you Vaccinate”!!!

April Renée is the spokesperson for the Vaccine Information Coalition (VIC), and the former President of The Autism Autoimmunity Project (TAAP). She is available for presentations that are based on more than 20 years of research and are all scientifically documented. She has spoken at many colleges, institutes and organizations, and will soon be travelling to London by invitation of the College of Naturopathic Medicine. April is also a popular guest on radio and TV programs.

For more information about Vaccines, please visit VIC’s website: [www.VACinfo.org](http://www.VACinfo.org); there you will find links to many other great websites on their “Resources” page. “Educate BEFORE You Vaccinate” business cards used for spreading the word to a misinformed world may be ordered at no charge.
