TELEVISION

Week 1 Video Transcript

# The Merchants of Death or “Welcome to the Disease Economy”

**Dr. Jeff Hazim, BHtv Executive Director**

## As a Christian, are you part of the problem, or separated from it?!

For the Biblical Health TV launch, I gave a teaching titled, “Why Your Life and Faith Depend on Biblical Health;” it’s now posted in the member’s area, on the “BHtv Preview” page. I’ll reiterate a few of the essential points from that video as a lead into today’s class. I’ve done a lot of fresh research in preparation for what I’m about to share, and there’s so much to cover, so you will see and understand Clearly what is happening in the world around us, why you SHOULD NOT be part of it, and how to get yourself free and clear from its deadly grip. Alright, so let’s get started...

I’m Dr. Jeff Hazim, and I am honored to deliver Biblical Health TV’s inaugural teaching. As one of this network’s co-founders, I’ve decided to use this platform to lay a foundation on which you AND BHtv can launch off on a successful journey together, in pursuit of our Creator’s plan for true health.

We promise to keep our Teachings on BH.tv, short, concise, and full of meat. So there is no fluff, only 100% useful, impactful, and life altering information

I’ve been a Chiropractic Physician and Natural Health Professional for over 20 years, and a Believer in Jesus as my Messiah for nearly that long. I cofounded Biblical Health Television along with Chaim Goldman, and we have a mutual passion to bring the word of natural, God-ordained, Biblically-centered health to the Body of Christ, Worldwide.

Through BH.tv, we are leading a battle cry in the worldwide believer community to establish a new economy, based on health, freedom, and sovereignty. But first we must, by necessity, expose the un-holy grail of the [PUNCH IT] **modern disease economy [PAUSE]**, we also must help you realize you’ve been part of it [PAUSE], and MOST IMPORTANTLY help you GET OUT OF IT, A-S-A-P!

In today’s class I will:

1. Remind you of who you are
2. Show you with hard-core, scientific facts what’s really happening in the world
3. Help you realize how you are an **unwitting** accomplice to evil because of the things you support, and
4. Show you how to STOP PARTICIPATING in the “gentile” madness, in essence how to Come Out of Babylon

## So, just “Who are YOU?!”

Since we are a Bible-based organization, let’s answer that question directly from Scripture.

- And you shall **be** to Me a **kingdom of priests** and a **holy** nation.’ [Exodus 19:6](#)
- “And you shall **be holy** men to Me: [Exodus 22:31](#)
- For I am the LORD your God. You shall therefore **consecrate yourselves**, and you shall **be holy**; for I am **holy**. [Leviticus 11:44](#)
- For I am the LORD who brings you up **out of the land of Egypt**, to **be** your God. You shall therefore **be holy**, for I am **holy**. [Leviticus 11:45](#)
- “For you are a **holy people** to the LORD your God; the LORD your **God has chosen you** to **be** a people for Himself, a **special treasure above all the peoples** on the face of the earth. [Deuteronomy 7:6](#)
- and that He will **set you high above all nations** which He has made, **in praise, in name, and in honor**, and that you may **be** a **holy people** to the LORD your God, just as He has spoken.” [Deuteronomy 26:19](#)
- just as He chose us in Him **before** the foundation of the world, that we should **be holy and without blame** before Him in love, [Ephesians 1:4](#)
- but as He who called you *is* holy, you also **be holy in all your conduct**, because it is written, “Be holy, for I am holy.” [1 Peter 1:15-16](#)
- He who is unjust, let him **be** unjust still; he who is filthy, let him **be** filthy still; he who is righteous, let him **be** righteous still; he who is **holy**, let him **be** **holy** still.” [Revelation 22:11](#)

### Who are you!

**You are called to be holy, set-apart, to look, act, and appear different from the rest of the world. You are a special treasure, set high above the nations. You have come out of Egypt (Babylon). You should not even think like the unbelieving world.**

The Apostle Paul taught us: Do not be conformed to this world, but be transformed by the renewing of your mind, that you may prove what *is* that good and acceptable and perfect will of God. [Romans 12:2](#)

### **You must make a choice: Be like the world or be different.**

God gave us a choice, and a command about which way to choose: “I call heaven and earth as witnesses today against you, that I have set before you **life** and death, blessing and cursing; therefore **choose life**, that both you and your descendants may live” [Deuteronomy 30:19](#)

When it comes to the world and what drives our economy, it is a disease culture. It’s a “diagnosis, take drugs or have surgery” world view that keep trillions of dollars flowing into the coffers of those whose interest is in keeping you sick, those in the business of [PUNCH IT] disease creation and maintenance.

### **Here is your choice, life or death.**

#### **Jeremiah 17 says it perfectly! (NKJV)**

Verse 5 reads, “Cursed *is* the man who trusts in man,” verse 7 reads, “Blessed *is* the man who trusts in the LORD.” The question of the day is: do you want to trust man for your health or God? You’ll find man’s

solutions to your problems in the drugstore, and you'll find God's in the Bible.

In the weeks, months and years to come, BH.tv 's Experts will teach you all about the God's plan for your health, (how to achieve good health and KEEP IT!). But at its core, it really is mostly about agreeing with His Biblical plan, and practicing it, to simply prevent sickness and stay healthy in the first place. You need to be aware of what foods and health practices God created to keep you whole, and what "plagues" are in store for you when you walk away from His plan.

**When we launched WellwithU.com a few years ago, Deuteronomy 4:40 was our guiding Word: "You shall therefore keep His statutes and His commandments which I command you today, that it may go well with you and with your children after you, and that you may prolong *your* days in the land which the LORD your God is giving you for all time."**

And you know what, Deuteronomy 28 sums God's plan for our health, for our very lives from two perspectives:

Verses 1-2: "Now it shall come to pass, if you diligently obey the voice of the LORD your God, to observe carefully all His commandments which I command you today, that the LORD your God will set you high above all nations of the earth. <sup>2</sup>And all these blessings shall come upon you and overtake you, because you obey the voice of the LORD your God:

Verse 15: "But it shall come to pass, if you do not obey the voice of the LORD your God, to observe carefully all His commandments and His statutes which I command you today, that all these curses will come upon you and overtake you:

You see, God has a plan for you. But, even if you have walked away, it's never too late to **turn back** to His ways. In Hebrew the word for repentance is Tshuvah (which literally translates as "Turn Back to God"), and in so doing you turn away from sin, evil, and anything else that is not of Him. Even if you become ill, He has a plan, just go back to His ways, or in other words "diligently obey the voice of the LORD". In its simplest form, that is Biblical Health. In the New Testament it proclaims that if anyone among you is sick, let him call for the **elders** of the church, and let them pray over him, anointing him with **oil** in the name of the Lord. **Note that James 5:14 does NOT say turn to drugs and surgery.**

The Lord even teaches us how to promote healing using what He has given us.

In the middle of its street, and on either side of the river, was the **tree of life**, which bore twelve fruits, each tree yielding its fruit every month. **The leaves of the tree were for the healing of the nations.** [Revelation 22:2](#)

Today I want to show you just how sick the world is, how much money and resources are exhausted on the creation and maintenance of our disease and the drug culture, and then help you, **AS A BORN-AGAIN** believer, to make the decision to **NO LONGER** be part of it!!!

**I am not even going to get into the illicit drug world, but do you remember that the US declared a war of drugs in the 70's, (against things like marijuana, cocaine, LSD, etc.)? What hypocrisy! Here in the USA we use 28% of all the LEGAL drugs in the world, yet we represent only about 4% of the world's population.**

Here is a perfect example of how we live in a DRUG CLUTURE!

**Good news. Save money and feel better with the Publix Pharmacy FREE Medications Program.**

At Publix, we're always looking for ways to **make your life easier**. And helping you **manage healthcare costs** is no exception. That's why we're **proud to offer** a variety of some of the most-often prescribed medications to you absolutely free.

- **FREE Lisinopril!**- for blood pressure, certain heart conditions, diabetes, and certain chronic kidney conditions.
- **FREE Antibiotics-** to kill those pesky bugs
- **FREE Metformin-** for Diabetes Management

FREE people! FREE drugs at your friendly neighborhood supermarket. Ironic, but in today's industrialized food culture, those pharmaceuticals might just be the healthiest thing IN the store....but I digress....

## **Let me finish up this introduction by telling you what the Scriptures say about the world of Drugs!**

### **Revelation 18:23-24**

“The light of a lamp shall not shine in you anymore, and the voice of bridegroom and bride shall not be heard in you anymore. For **your merchants** were the great men of the earth, for by your **sorcery** all the nations were deceived. And in her was found the blood of prophets and saints, and of all who were slain on the earth.”

Now, that word for sorcery is actually “pharmakia”, which is the Greek root from which we derive, yes, you guessed it: Pharmacy and Pharmaceutical. This is the world of Drugs. In other Bible translations the word Pharmakia is translated as witch doctors, witchcraft, magic spell and magic.

So running to the medical world verses the Biblical Health approach is Sorcery, Witch Doctors, Witch Craft, Magic and Magic Spells. Not a good witness to your faith as a born-again believer!! If you are part of this world then you are certainly not being Holy (set-apart, consecrated, Blameless) in this area of your life.

## **And where will this entire “Babylonian/Egyptian” system wind up and why should you have NO PART of it? Scripture declares, “Come out of it! Be holy!”**

### **Revelation 18:1-6**

“After these things I saw another angel coming down from heaven, having great authority, and the earth was illuminated with his glory. And he cried mightily with a loud voice, saying, “**Babylon the great is fallen, is fallen, and has become a dwelling place of demons, a prison for every foul spirit, and a cage for every unclean and hated bird! For all the nations have drunk of the wine of the wrath of her fornication, the kings of the earth have committed fornication with her, and the merchants of the earth have become rich through the abundance of her luxury.”**

Remember what it said in verse 23: **the merchants** were the great men of the earth who deceived the nations with their **sorcery**.

## **Are you being deceived by the sorcery, the witch craft, the magic spells? You are if you support the medical/pharmaceutical industries with your lifestyle, purchases**

**and health decisions? You are supposed to be different from the world, are you not?  
What does God's word call for you to do?**

Revelation 18:4-6, "And I heard another voice from heaven saying, "**Come out of her, my people, lest you share in her sins, and lest you receive of her plagues.**"<sup>5</sup> For her sins have reached to heaven, and God has remembered her iniquities.<sup>6</sup> Render to her just as she rendered to you, and repay her double according to her works; in the cup which she has mixed, mix double for her. "

This is where we are today: **the merchants of the earth have become rich through the abundance of her luxury,** deceiving nations by their **sorcery, pharmakia, witch doctors, witchcrafts, magic, and magic spells....their drugs.** Big Pharma (the worldwide drug industry) has created a DISEASE ECONOMY:

**To the Tune of \$880 billion per year for Drugs (2011)**

**More than the Gross Domestic Product (GDP) of 168 different nations**

At present, the global pharmaceutical market is dominated by the US, which accounted for about 28 percent of global sales in 2009, followed by the EU, accounting for nearly 15 percent, and Japan for 12 percent. Together, these three markets represent nearly 55 percent of the global market.

**The disease economy is alive and flourishing**

**The US spent \$2.64 trillion on healthcare in 2011 (17.7% of GDP)**

**More than the GDP of every nation on Earth except China, Japan, India, Germany, and Russia**

**The World spent \$5.3 Trillion on Healthcare in 2007**

**More than the GDP of every nation in the world except the USA and China**

**\$5,300,000,000,000 -about 10% of all money spent by every nation in the world in 2007 (approximately \$54 trillion) was supporting the Disease Economy**

**In 2010, the World Gross Domestic Product was almost \$75 trillion, so I suspect healthcare costs were up near \$7.5 trillion (and likely more, as the indicator for most nations is that healthcare expenditures are growing at a faster rate than their GDP)**

A huge percentage of the economic activity and economic growth in the US is based on the manufacturing, marketing and selling of products and services based on disease. That is, products and services that either cause diseases or "treat" those diseases. That is a Disease Economy.

When you go into grocery stores and look at what's being sold there, you're getting a good look at the economic activity in this country. You mostly see products that promote disease rather than health, thanks to their disease-causing ingredients.

It's an amazing statistic that the top 10 pharmaceutical companies profited more than 60 Billion dollars in 2009 as reported by CNN Money, May 3, 2010. An industry that had revenues of 880 Billion in 2011 and which, just the top 10 companies made profit of \$60 Billion in 2009. That is a lot of cash moving around. This makes for a booming disease economy. And who would want to stop a successful global economy like that, especially with the financial mess our world is in today?

## **An economy based on paying for disease**

In the US alone, look at the quality of the products and services that are being exchanged for these 2.64 trillion dollars. Our economy is tied to chronic and degenerative disease. We're basing our economy on the idea that we can treat more and more people with drugs and medical services and keep selling them soft drinks and fast foods, all while calling it "economic growth".

Do you know that the Fast Food Industry in the US raked in over 110 Billion dollars in 2000 , accounting for well over 50% of all the money spent on food in the US? 50%!! And that 110 Billion is only fast foods; it does not include all the money spent on junk foods. So what was left to spend on REAL FOOD? We spend under 200 billion on food in the US each year, and as you can tell when you crunch the numbers we spend most of it on fast and junk foods. Do you support this disease system?

In 1970, Americans spent about \$6 billion on fast food, but now Americans spend more money on fast food than on higher education, personal computers, computer software, or new cars. They spend more on fast food than on movies, books, magazines, newspapers, videos, and recorded music – combined!

**We cannot create abundance by selling each other increasingly expensive products and services that promote disease.**

We cannot create abundance by poisoning ourselves.

Real economic growth is about providing more goods and services to people in a more efficient manner. Those goods and services are supposed to improve the quality of life for those people. Entrepreneurs compete in a free market; they devise clever and efficient ways to create, produce, and deliver goods and services to consumers that would ultimately enhance their quality of life, and if you succeed in doing so, as an entrepreneur, you can be successful.

Now **we're seeing an economy that is increasingly based on goods and services that do not add to the quality of consumers' lives but rather take away from it.** We're seeing entrepreneurs and creative, clever people finding new ways to market products that harm people.

We see this quite blatantly in the drug industry, where creative marketers keep coming up with new, absurd ways to sell drugs to people through direct-to-consumer advertising on television. Some of these ads are absolutely idiotic in what they are promising. Yet, they are effective in creating demand. They sell products, but these products do not help consumers.

What I am saying is that we have an economy that is **based on the promotion of disease more than the treatment of disease.**

## **Want some Proof?**

### **Big Pharma Spends More on Advertising than Research and Development**

A study by two York University researchers estimates the U.S. pharmaceutical industry **spends almost twice as much on promotion as it does on research and development**

The researchers' estimate is based on the systematic collection of data directly from the industry and doctors during 2004, which shows the U.S. pharmaceutical industry spent 24.4% of the sales dollar on promotion, versus 13.4% for research and development, as a percentage of US domestic sales of US\$235.4 billion. The industry spent approximately US\$61,000 in promotion **per physician** during 2004. Sixty-One thousand for each and every Physician!

And the figure for 2004 is apt to be understated, as there are other promotion avenues that are not likely to be taken into consideration, such as ghost-writing and off-label promotion. Also, seeding trials, which are designed to promote the prescription of new drugs, may be allocated to other budget categories.

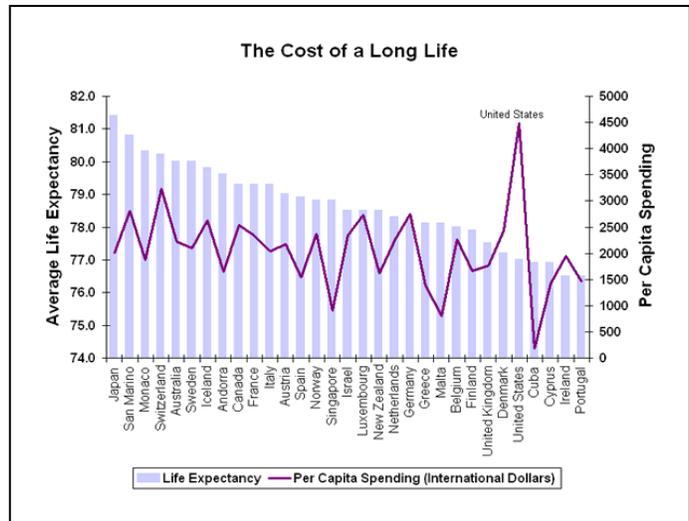

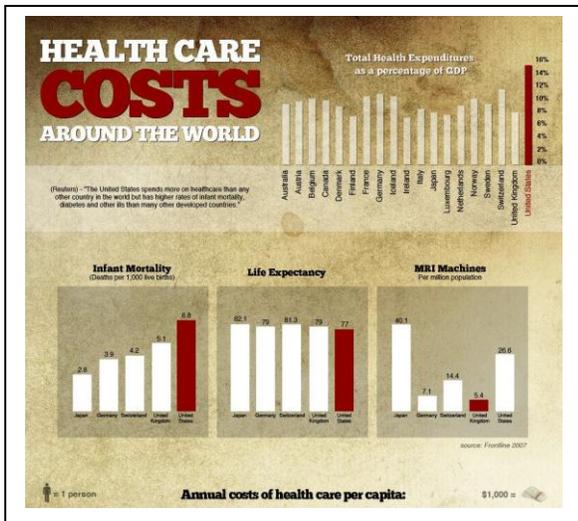

The authors focused their study on the United States because it is the only country in which information is available for all of the major promotion categories, and it is also the largest market for pharmaceuticals in the world, representing approximately 43% of the expenditures for global pharmaceutical sales and promotions.

As well, note the authors, the number of meetings for promotional purposes (that is where doctors get invited to fancy hotels, gala events, and exotic locations to get EDUCATED, I say INDOCTRINATED) has dramatically increased in the U.S. pharmaceutical industry, jumping from 120,000 in 1998 to 371,000 in 2004, (THREE HUNDRED AND SEVENTY ONE THOUSAND sponsored events, all centered around teaching MDs which drugs to push, and how to push them)

Thus, the study's findings supports the position that the U.S. pharmaceutical industry is a marketing-driven machine, and challenges the perception of a "research-driven, life-saving", pharmaceutical industry.

**Back to the Booming Disease Economy**

**So, does pouring more money into the system extend lives**

Despite the wide gaps, higher spending on health care does not necessarily prolong lives. In 2000, the United States spent more on health care than any other country in the world: Nevertheless, average US life expectancy ranks 27<sup>th</sup> in the world, at 77 years. Many countries achieve higher life expectancy rates with

significantly lower spending. This **Bar Graph** shows the top 30 countries in the world ranked by life expectancy. The **Jagged** line indicates per-capita health expenditure and shows that many countries outperform the US with approximately half the spending.

The chart also highlights the sharp contrast between the US and Cuba. With a life expectancy of 76.9 years, Cuba ranks 28<sup>th</sup> in the world, just behind the US. However, its spending per person on health care is one of the lowest in the world, at **\$186, or about 1/25 the spending of the United States**. Please note that every nation from Japan to Denmark has a higher life expectancy than the US, and achieves it with significantly lower spending on health care. We are the most prolific Disease Economy. **The merchants of the earth have become the richest through the abundance of the luxury of Amabylon (America/Babylon). Congratulations, America!!**

### **But the wealth of the “merchants” really creates an economic burden of chronic disease on the people.**

Over 162 million cases of seven common chronic diseases — cancers, diabetes, heart disease, hypertension, stroke, mental disorders, and pulmonary conditions — were reported in The United States in 2003. These conditions shorten lives, reduce quality of life, and create considerable burden for caregiver.

Reported Cases in The United States, 2003 (and as % of population*)		
Cancers:	10,555,000	(3.7%)
Diabetes:	13,729,000	(4.9%)
Heart Disease:	19,145,000	(6.8%)
Hypertension:	36,761,000	(13.0%)
Stroke:	2,425,000	(0.9%)
Mental Disorders:	30,338,000	(10.7%)
Pulmonary Conditions:	49,206,000	(17.4%)

\*As % of non-institutionalized population. Number of treated cases based on patient self-reported data from 2003 MEPS. Excludes untreated and undiagnosed cases

### **Without question, the U.S. economy is heavily invested in disease. Are you?**

We also see a lot of products being marketed and sold to consumers that may give them very short-term benefits (really pleasure, not benefits) -- such as Junk foods-- but have long-term detrimental consequences, like obesity, heart disease, brain disorders, cancer and diabetes. These diseases largely come about as a result of long-term consumption of nutritionally depleted foods.

Retailers like Walgreens have mastered the art of selling products on both sides of the equation. At the front of the store, Walgreens sells junk food products, soft drinks, candy and a lot of food (non-foods) that really have no nutrition. At the back of the store, they sell prescription drugs -- drugs that treat the symptoms of diseases **that are ultimately caused by people's poor dietary choices and their consumption of junk food**. What an awesome business model! They steal the battery out of your car when you are not looking and then sell it back you around the corner (that analogy courtesy of the New Yorker in me). In the middle of the store they sell things to make you look and smell good or change your external appearance in some way like

perfumes, cosmetics, and hair dyes, so the fact that you are rotting inside won't be apparent to all the other people who are also rotting inside! "Woe to you, scribes and Pharisees, hypocrites! For you are like whitewashed tombs which indeed appear beautiful on the outside, but inside are full of dead men's bones and all uncleanness. [Matthew 23:27](#)

They sell you the problem and the treatment, all in the same store. One stop shopping, my friends, how amazingly convenient! This is the disease economy at its finest. Walgreens, as an institution, has embraced the "disease creation and maintenance" business model, perhaps even more so than pharmaceutical companies, and taken its application to a new level. You can even get a flu shot there 24 hours a day, 7 days a week!

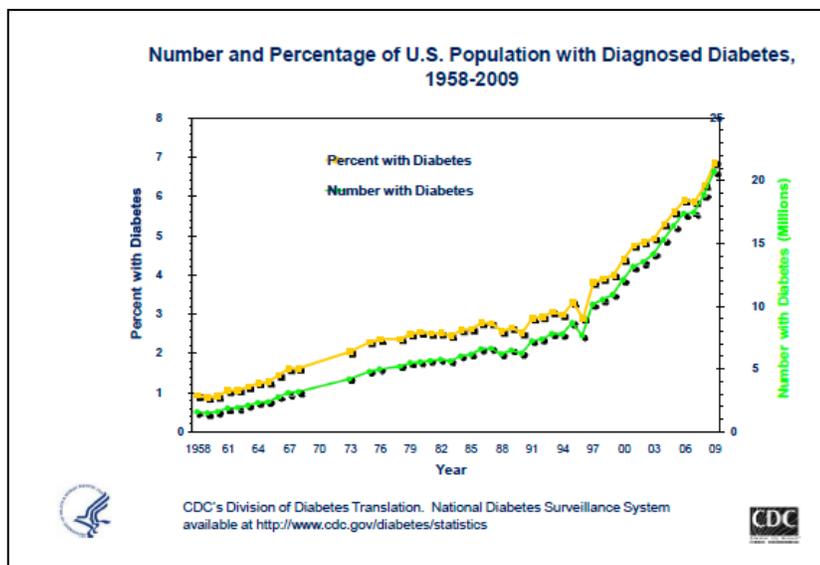

And let's not leave out all those chemical companies manufacturing pesticides, herbicides, fungicides, toxic household cleaners and toxic personal care products. A lot of those personal care and skincare companies are really just chemical manufacturers with fancy marketing and lots of women in lab coats selling you products that actually harm your health; that literally contain ingredients that cause cancer and liver disease.

The chemical industry, one of the largest in the U.S., is an enterprise worth \$674 billion and should be considered one of the key players in this disease economy. The U.S. chemical industry operates through 170 major chemical companies with international operations spanning more than 2,800 facilities outside the U.S. and 1,700 foreign subsidiaries or affiliates. The U.S. industry employs around a million people. It is also the second largest consumer of energy in the manufacturing sector.

And if you look at the entire worldwide cosmetic industry, sales have reached about \$170 Billion dollars a year. It's distributed pretty uniformly around the world with ~\$40 billion in the Americas, ~\$60 billion in Europe, ~\$60 billion in Australia & Asia, and another \$10 billion in Africa. The Western world spends a bit more per person, but India and Asia are quickly catching up.

**We are a nation (and a world) of diseased individuals motivated by economic incentives to stay in the business of disease creation and maintenance. Let's look at some specific diseases.**

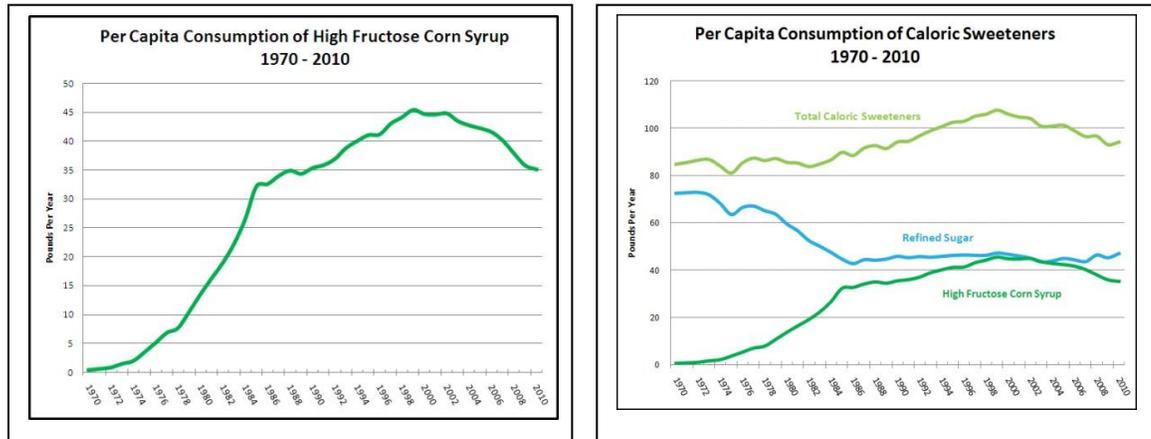

## Diabetes

The prevalence of diagnosed diabetes increased from 0.9% in 1958 to 6.9% in 2009. In 2009, 20.7 million people had diagnosed diabetes, compared to only 1.6 million in 1958.

## Summary (Corn Refiners Association)

High Fructose Corn Syrup was introduced into the American Food Supply in the 1970's, at roughly the same time as partially hydrogenated oils. Since then, we've had epidemic levels of obesity, the highest rates of disease, and the lowest life expectancy of any industrialized nation. Those facts are not a coincidence.

## Obesity according to the Center for Disease Control (CDC)

**Obesity is common, serious and costly.**

- About one-third of U.S. adults (33.8%) are obese.]
- The number of states with an obesity prevalence of 30% or more has increased to 12 states in 2010. In 2009, nine states had obesity rates of 30% or more. In 2000, no state had an obesity prevalence of 30% or more. Are you listening?
- Obesity-related conditions include heart disease, stroke, type 2 diabetes and certain types of cancer, some of the leading causes of death.
- In 2008, medical costs associated with obesity were estimated at \$147 billion

### Obesity rates among all children in the United States

- Approximately 17% (or 12.5 million) of children and adolescents aged 2—19 years are obese. How can we allow this? Our poor children!
- Since 1980, obesity prevalence among children and adolescents has almost tripled.

## Cardiovascular Disease (CVD)

Heart Disease is the Number One Cause of Death. About every 25 seconds, an American will have a coronary event.

Heart disease is the leading cause of death in the United States and is a major cause of disability. In 2010, an estimated 785,000 Americans had a new coronary attack, and about 470,000 had a recurrent attack. About every 25 seconds, an American will have a coronary event, and about one every minute will die from one.

- Heart disease killed 26% of the men who died in 2006—more than one in every four.
- **Half of the men who die suddenly of coronary heart disease have no previous symptoms.**

Several medical conditions and lifestyle choices can put men at a higher risk for heart disease, including—

- High cholesterol
- High blood pressure
- Diabetes
- Cigarette smoking
- Overweight and obesity
- Poor diet
- Physical inactivity
- Alcohol use

World Health Organization

- An estimated 17.3 million people died from Cardiovascular Diseases (CVDs) in 2008, representing 30% of all global deaths.
- By 2030, almost 23.6 million people will die from CVDs, mainly from heart disease and stroke.

## Cancer

### What Are the Costs of Cancer?

The National Institutes of Health estimates overall costs of cancer in 2010 at \$263.8 billion: \$102.8 billion for direct medical costs (total of all health expenditures); \$20.9 billion for indirect morbidity costs (cost of lost productivity due to illness); and \$140.1 billion for indirect mortality costs (cost of lost productivity due to premature death).

### Estimated New Cancer Cases and Deaths by Sex for All Sites, US, 2011\*

Estimated New Cases				Estimated Deaths		
Both Sexes		Male	Female	Both Sexes	Male	Female
All Sites	1,596,670	822,300	774,370	571,950	300,430	271,520

Estimated deaths are based on data from US Mortality Data, 1969 to 2007, National Center for Health Statistics, Centers for Disease Control and Prevention. ©2011, American Cancer Society, Inc., Surveillance Research

## The disease economy is all around you

You're probably participating in it, and if you think you're not, check again, because almost everyone is. You're consuming, bathing in, and grooming with toxic chemicals. You readily hand over your hard earned cash for non-nutritive genetically modified Franken-foods.

And when you get sick, and YOU WILL, you quickly run to the doctor or pharmacy and pay into the mammoth medical/industrial/agribusiness/pharmaceutical complex.

You do it because you know no other way. And that is why we created Biblical Health Television, my brothers and sisters, to open your eyes and open your mind to a NEW and BETTER way, a way that is consistent with the FAITH you proclaim.

Or, we can all just continue to stimulate the economy, the disease economy, by creating more and more diseases by the way we live, and then we can keep counting on Big Pharma to invent more and more expensive treatments (notice, I didn't say "cures") for the diseases we created.

That would stimulate a lot of spending, huh? You'd have to eat more because the junk you are consuming has no nutrition, so you will always be hungry. And then you'd have to get some expensive health care for that Diabetes, Cancer, Cardiovascular Disease, Pulmonary Dysfunction and Arthritis you caused with your lousy diet.

It's something like this: If you just want to create jobs and economic growth, first, hire half the nation to be window washers. Give them all a spray bottle and squeegee. Their job is to keep all the windows clean. Then you hire the other half of the nation to fling mud. Their job is to go around and make sure they make every window as filthy as possible. You do that and you will have full employment! The

window washers would have unlimited work and the mud-slingers would be in demand day and night. Sounds insane, doesn't it? It all seems good until someone stands up and shouts:

**“But nothing is being produced!”**

**So, since no one else is willing to say it, I will:**

**PEOPLE, NOTHING IS BEING PRODUCED IN THIS DISEASE ECONOMY EXCEPT A LOT OF WEALTHY MERCHANTS OF DEATH, AND A LOT OF SICK PEOPLE**

That's exactly what is happening in today's so-called health care system. One side makes you sick; the other gets paid to temporarily treat the illness. And many times both sides are the SAME COMPANY!

As Chaim often says, “Oy vey!”

## **Transforming the Disease Economy into a Health Economy**

So....Enough about the problem; what about the solution?

The Lord says: “**Awake**, you who sleep, Arise from the dead, And Christ will give you light.” [Ephesians 5:14](#)

Remember: “you are a **holy people** to the LORD your God; the LORD your **God has chosen you** to be a people for Himself, a **special treasure above all the peoples** on the face of the earth. [Deuteronomy 7:6](#)

### [Isaiah 52:1-2](#)

Awake, awake!  
Put on your strength, O Zion;  
Put on your beautiful garments,  
O Jerusalem, the holy city!  
For the uncircumcised and the unclean  
Shall no longer come to you.  
<sup>2</sup> Shake yourself from the dust, arise;  
Sit down, O Jerusalem!  
Loose yourself from the bonds of your neck,  
O captive daughter of Zion!

How do you change? And I am talking to the YOU, the believer The answer is to, “Come out of her My People”.

**It's time to break free! Call on the Lord and He will answer you. Ask the Holy Spirit to penetrate your mind, will, and emotions with the light of truth and life. Your body is the temple of the Holy Spirit. Let Him SET YOU FREE from being bound to the things of this world which bring death.!**

After that, it comes down to Biblical Education and getting on God's plan...

So, you must fully recognize that you have been duped. You have, unknowingly been involved with the “merchants of Babylon” the “merchants of death”. We need a health economy that's founded on wellness promotion and disease prevention, bolstered by continual, factual health education. Trust in the Lord, not man. Obey the Lord, He has a plan. Learn his plan and stick to it.

To accomplish this, you must stop patronizing those companies and organizations that promote death. Rather, stand out and be different from the world.

## **Vote with your dollars**

You CAN remove yourself quite significantly from this disease economy, just by voting with your money. Stop funding these drug companies, junk food companies, toxic personal-care product manufacturing companies, pesticide companies and petroleum companies, and chemical companies like Monsanto. You stop buying their wares, and you starve them of economic growth.

What's the alternative? You go somewhere else. Buy from local markets; look in your grocery cart. Ask yourself, "What am I investing in here? What am I supporting?" Commit yourself to making positive changes so that you support the companies, organizations and individuals that are actually doing something positive.

Practice prevention. If you live like the world you WILL die like the world. If you do not follow God's plan you will suffer the plagues of the nations!

We have depression, cancer, diabetes, heart disease, and a long list of other chronic diseases that are devastating our Churches, and not just our adults and senior citizens, but now our children too. Most of us (including a majority of licensed physicians) remain completely and utterly ignorant of the relationship between nutrition and health.

The church, to this date, has looked no different. We continue to allow the drug companies and junk food companies to exploit consumers and brainwash the Saints into thinking they need chemicals or junk foods in order to be healthy, feel good or be popular. Again, the church looks no different than the rest of the world on these issues. We have a system that is dominated by evil industries (food, drug, cosmetics and chemical industries, primarily) that really have no purpose other than to generate profits. And the church supports it, ignorant to the fact that they have partnered with the merchants of Babylon, the merchants of death.

**Come out of her, my people, lest you share in her sins,  
and lest you receive of her plagues.**

**God has chosen you to be a people for Himself,  
a special treasure above all the peoples**

**And He's coming for a Spotless Bride!**

**It's time to act like it!**
